Government higher secondary school, Hathkuri Panna	10th Class	8/1/2019 - 7/4/2020

Projects

Language translator

- **Technologies used:** Python and Google libraries.
- **Description:** This project is used as a translator to translate among two different languages of choice, with the option to translate from either text or voice. It is capable of real-time text and voice translation.

YouTube clone

- **Technologies used:** HTML, CSS, JavaScript.
- **Description:** This project aims to provide identical functionality and user experience of youtube.

Portfolio-Project

<https://responsive-portfolio-himanshu.netlify.app/>

- **Technologies used:** HTML, CSS, and JavaScript.
- **Description:** Built a personal portfolio website to showcase my projects, skills, and contact information. It's fully responsive and easy to use on all devices. The site also includes links to my GitHub and project repositories.
